Cloud Fleet Manager

Digital ship management

Modern communication meets practical application: Discover a new way of efficient worldwide collaboration

Reviewing and analysing information is a well-known problem, both in shipping as well as other industries. Finding a specific piece of information can be difficult and time-consuming since data is often kept in multiple places and lacks traceability. The consequence: Data is found several times or is incomplete and the accuracy of information cannot be guaranteed anymore.

Cloud Fleet Manager provides you with worldwide access to central and uniform data without loss or recurrences. Due to the exchange of information on an intuitively designed platform, media breaks are avoided, and efficiency is increased. More than

40 different apps that are specially adapted to the requirements of the different departments of your company lead users through their processes in an intelligently structured way.

Distinct colour coding helps users to identify critical tasks and to set priorities. The intranet, which serves as your point of entry, provides you with a clear view of your shipping company and centrally pools the most relevant information out of all modules. This allows a quick overview of upcoming and critical tasks at any time and without the need to search for information. Even on the move you always have access to your data.

Central
All relevant information is always available in a central solution.

Interconnected
Connect your employees on land and at sea to globally operating teams.

Intuitive
Immediate access. Time- and cost-consuming trainings are history.

CFM Go
With the mobile app CFM Go, all your relevant data is always with you.

Cloud Ship Manager

Installed on board, Cloud Ship Manager (CSM) offers several apps for the use at sea to integrate your fleet directly into all processes. It is intuitively usable and enables your crew, to capture data at sea and to forward it to the office. This way, fusing your crew on board and your personnel on shore to jointly acting teams.

Worldwide access

The cloud-based design of the application gives you the freedom to use Cloud Fleet Manager any-time, anywhere and browser-independent. Even on your smartphone you always have access to the most important information. Powerful mobile apps, like CFM Inspection Report, CFM Purchase Mobile or CFM Go complete our solution.

Integrate your partners

Data not only has to be exchanged internally but also with external service providers and partners. In order to make the communication and the ex-change of information with your partners as easy as possible, we have developed CFM Partner Portal. Give your partners insight into relevant data – in real time. You always have full control over which information is shared.

About Hanseaticsoft

Hanseaticsoft was founded in 2009 by Alexander Buch-mann. Buchmann and his team draw on several years of experience in the software department of a medi-um-sized shipping company in Hamburg, the third largest container harbour in Europe. In Hanseaticsoft, the idea of a new software concept was finally re-alised: giving enterprises access to new and efficient technologies by means of intuitive software solutions. Today Hanseaticsoft has more than 60 employees. It is now part of Lloyd's Register Group, one of the world's leading providers of professional services for engineering and technology – improving safety and increasing the performance of critical infrastructure for clients in over 75 countries worldwide.
